Period for Reply -- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Election/Restrictions

The Applicant elected Species I with traverse for claims 1-4, 20, 33, 70 and 92-94. In support of traversal, the Applicant' argues that "two or more separately usable subcombinations are usually restrictable when they do not overlap in scope and they are not obvious variants" is noted, however, the Examiner did not present a restriction by way of subcombination usable together. Instead, the Examiner set forth an election of species requirement. Lastly, the Applicant states that there is no serious search burden. The Examiner disagrees with such assertions, in that, multiple independent electronic search queries would be necessary in order to properly search the listed specie.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-4, 20, 33, 70 and 92-94 are rejected under 35 U.S.C. 102(b) as being anticipated by ***Nemoto et al (US Patent 5,956,798)***

Nemoto teaches a nonabsorbent particle entrapment pad which is structurally similar to the Applicant's claimed pad. More specifically, the device include a bonded high loft, non-absorbent nonwoven top layer (1) having an open pore matrix attached to a barrier bottom layer (3). The top[layer is adapted to receive externally applied fine to coarse

solid particles and retain the collected particles within the pad. Regarding claim 2, a cling enhancing substance is applied within at least a portion of said fibers. Regarding claim 4, the powdered carbon is believed to be a counter- active agent. As for claims 20, the device of Nemoto will collect dust particles. Regarding claims 92-94, the cling enhancing agent of Nemoto is sticky in the sense that dust particles will attach to it during use.
